# Account Balance

For each seller we have developer account balance within our system. Each time an order is placed by your client, your balance changes.

1

Your client purchased for example 'Likes turbo' product from your website

2

'Likes turbo' is sold for \$1 on Kickliker and cost for our dealers is 50 % or 30 % on our products, based on dealer package

3

For a „START“ package the cost for 'Likes product 1\$/1000' is \$0.5. You can resell it for your own price. For example \$1.5 which means 1\$ profit for you

4

After what your balance changes for -\$0.5. We queue your order and start working on it

In case of insufficient funds are available on your account balance or your balance is negative, your orders will be not processed

You can add funds to your account balance through admin dashboard via Stripe service or PayPal

The screenshot shows the Kickliker admin dashboard. On the left is a dark sidebar with a menu containing: Main page, Catalog, Parameters, Users, Orders, Category, Blog, Blog categories, Uploads, Meta, Updates, Admin-panel users, Prices, and Logout (Vojtech). The main content area is white and titled 'Kickliker'. It features two prominent boxes: a green one on the left showing a 'Dealer balance' of \$ 560.438 with a 'Pay now' button below it, and a teal one on the right showing a 'Turnover' of \$ 6876.84.
